

We Wrote the Book On Waterstop

The Little Book of Waterstop

First published March 2013, The Little Book of Waterstop remains to be the only book on the topic. It is freely available to anyone and everyone.

Invented the Technology Used to Mechanically Weld Waterstops

U.S. Patent 4,867,835

Patented by Bill J. Poole in September 1989, the ST-10® holds the waterstop in place and applies even and continuous pressure against the waterstop splicing iron to produce high-quality welds.

Developed a Tool that Creates Keyed Joints and Centers Waterstop

U.S. Patent 11,136,731

Patented by David R. Poole and Steve Potter in October 2021, Keycup® is a lumber replacement that centers the waterstop and simultaneously create keyed joints. It peels away with no form release.

*Why we're the
Waterstop Experts™*

About us

Since 1954, waterstop has been our sole focus, we are the manufacturer of Earth Shield® waterstops, which notably have the industry's best physical properties. We are the first waterstop company to achieve NSF 61 certification, and continue to be the leading innovators in the industry.

Hours of Operations

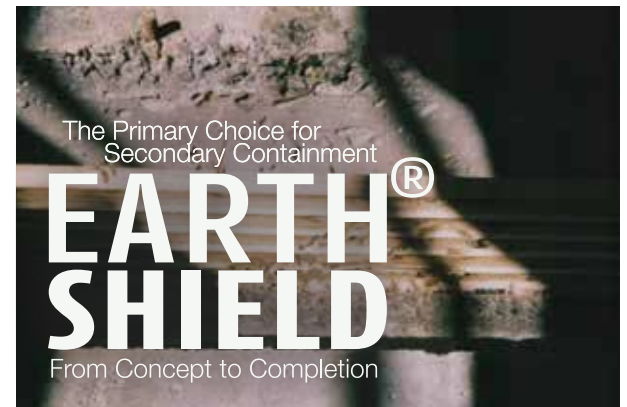

Monday - Friday - 7am - 3:30pm PST

*We know
waterstop so you
don't have to.*

What We Offer

Solutions

From concept to completion, J P has your back. Our expert staff is ready to help you waterproof anything with Earth Shield. We'll even teach you to install waterstop through numerous technical bulletins, videos, and on-demand online courses.

- Complete Plan Takeoff and Waterstop Map
- 3D Isometric Waterstop Fitting Details
- Full Technical Data Team
- Testing and Certifications
- Complete Product Catalog

Services

At J P Specialties, we don't stop working until you're completely satisfied. You can be confident that you are getting the correct products and know-how when you purchase from the Waterstop Experts™.

- 24/7 Support
- One on One Engineering Meetings
- On Site and Online Waterstop Welding Certification Courses
- Specification Consultation
- Jobsite Delivery
- Exclusive Waterstop Site Pickup and Recycling Services

Flexibility

We know all about the challenges faced in construction. With the only purpose-built waterstop installation tools, and a heavily customizable product line; We are proud to remove waterstop from your list of headaches.

- Custom Labeling and Packaging
- Release Scheduling
- Custom Roll Lengths
- Custom Profiles
- Custom Fittings

1. TPV Waterstop

Thermoplastic Vulcanizate Waterstop

2. PVC Waterstop

Polyvinyl Chloride Waterstop

3. MCR Waterstop

Hydrophilic and Mastic Waterstop

4. S/S Waterstop

Stainless Steel Waterstop

*Manufactured
in Murrieta,
California*

Welding Irons

A necessity in any waterstop installation for fluid-proof homogeneous welds.

The ST-10®

A portable waterstop welding table that is the perfect solution for producing high tensile strength, leak-proof welds on thermoplastic waterstops.

Keycup®

A reusable concrete accessory that securely holds and centers waterstop, while creating a keyed construction joint.
