Tech Tips 009

Joining Type NB190® to an Expansion Joint Waterstop
by David R. Poole, CSI, ACI

1. Apply ¼” high by 1” wide by 3” long mass of Type NB190® Adhesive to the fins of an embedded expansion joint waterstop.
2. Firmly press hydrophilic strip waterstop onto mass of Type NB190® Adhesive.
3. Place concrete without displacing or disturbing the position of the joined waterstop.
